

Who We Are

LinkTec is a SBA-approved 8(a) Mentor-Protégé Joint Venture (JV) between CollabraLink and Sevatec that provides mission-critical IT services for the federal government. LinkTec combines the capabilities, infrastructure, and resources of both firms to deliver exceptional value for our government clients and the American taxpayer. LinkTec offers a complete suite of mission-support solutions, including application development, cyber security, data analytics, IT infrastructure, and business process management, to advance the mission objectives of our federal customers.

Through this unique partnership, LinkTec leverages the corporate qualifications of both firms, including ISO 9001:2015, ISO/IEC 20000-1:2011, and ISO/IEC 27001:2013 certifications, and CMMI Maturity Level 3 ratings for both Development (DEV) and Services (SVC). With proven experience across Homeland Security, Defense, Civilian and Health communities, LinkTec is well-positioned to meet the mission-critical needs of the federal government while accomplishing competitive small business contracting goals.

-  **Locations:** Headquartered in McLean, VA with additional offices in Fairfax, Crystal City and DC, and CONUS and OCONUS project locations
-  **Employees:** 500+ technology and management professionals
-  **Certifications:** CMMI Maturity Level 3 for Development and Services; ISO 9001:2015, ISO/IEC 20000-1:2011, and ISO/IEC 27001:2013
-  **Infrastructure:** Mission Support Office (MSO) that provides IDIQ and TO-specific management processes, tools, and resources

What We Do

LinkTec is committed to our client's missions. We deliver end-to-end services and solutions throughout CONUS and OCONUS locations. Our leadership in information technologies leverages international standards and best practices to provide superior service management and overall performance for our clients.

Agile and DevOps Transformation

Developing efficient and flexible software solutions to meet your mission objectives

Cyber Security

Ensuring the security of government systems, networks, and applications

Business Process Management

Harnessing the power of technology to create business value and competitive advantage

IT Operations and Infrastructure

Providing robust infrastructure and cloud capabilities to streamline operations

Data Analytics

Transforming your information assets into powerful decision-making tools

Who We Serve

LinkTec is dedicated to enabling successful mission delivery for defense, federal health, and civilian markets.

Homeland Security: Addressing challenges facing our nation, including homeland security, land and maritime border protection, transportation, citizenship and immigration

Defense: Implementing strategy and technology solutions that meet the mission objectives for the military and support our warfighters

Civilian/Health: Protecting health and education information to enable stakeholders to manage and perform mission critical functions

Working With Us

LinkTec partners with prominent innovators and thought-leaders to deliver innovative solutions that advance the mission objectives of our federal customers and provide best-value to the American taxpayer. LinkTec holds the following contract vehicles, making it a simple process to work with us:

- CMS SPARC
- GSA 8(a) STARS II

If you are interested in partnering with LinkTec, please contact us at info@linktecillc.com.

Our Mission Critical Work

USCIS Data Business Intelligence Section (DBIS) II Support Services

LinkTec is implementing an enterprise data warehouse and business intelligence solution to help strengthen the security and integrity of our immigration system. We leverage an Agile analytics approach to support the design, configuration, development, and maintenance of two main system components - eCISCOR and SMART. Our Agile teams support multiple simultaneous application development efforts that enable powerful data-driven decision making.

DHA Medical Network Operations and Security Center (MEDNOSC)

LinkTec provides integrated security support services to improve the delivery of healthcare to our nation's military. Our experienced professionals leverage emerging network and cloud-based technologies to continuously improve the availability, capacity, performance, and security of the Army Medical Network. We operate and sustain a highly complex enterprise-wide network environment that connects to multiple defense agencies, vendors, and supporting organizations.

USCIS Joint Engineering Teams - Sustainment (JETS)

LinkTec's JETS contract employs Agile and DevOps practices to support over 190K users within the customer service portfolio of the USCIS and hundreds of thousands of external users. JETS is comprised of multiple applications, technology stacks and stakeholders. Cross-functional teams design solutions and support 20 architecturally diverse applications at USCIS. Our support includes maintenance and modernization of this portfolio using leading-edge technologies and tools.

CollabraLink is a premier professional services firm that delivers business and technology solutions through consulting and outsourcing services to the government, private sector, and non-profit arena. CollabraLink specializes in custom systems development, system maintenance, integration and technology infrastructure support, and a wide variety of business services.
